

Proof of Concept

Airport Solutions

Team members:

Yanis Dimov- 3258033

Kaloyan Dragiev – 3214311

Rosen Panayotov – 3334643

Nikolay Nikolaev – 3235106

Nikolay Kolev - 3235106

Our goal:

Create an app, that allows airport management teams to input a set of variables, and monitor its effectiveness, allowing them to fine-tune the different aspects and thus allow them to make their business as effective as possible. Statistics at the end of the simulation should be provided in a comprehensive format with an accent on the bottlenecks and points of insufficient resources.

List of features (potential):

- Real-time statistics
- Real-time visual representation
- Possibility to speed up or slow down simulation
- List of statistics at end of simulation
- Weather effects (potential)
- Time-based graph (potential)

Our target group:

Airport managements, that wish to improve upon their administration and manage their resources in a correct manner.

GUI Design:
